Thin Solid Films 321 (1998) 267–271

thin solid films

Subject Index of Volume 321

Ammonium fluoride
Fabrication of SiGe quantum dots: a new approach based on selective growth on chemically prepared H-passivated Si(100) surfaces, 98
Antimony
Atomic hydrogen for the formation of abrupt Sb doping profiles in MBE-grown Si, 120
Atomic force microscopy
Characterization of self-assembled Ge islands on Si(100) by atomic force microscopy and transmission electron microscopy, 86
Bimodal height distribution of self-assembled germanium islands grown on $Si_{0.84}Ge_{0.16}$ pseudo-substrates, 92
Atomic hydrogen
Atomic hydrogen for the formation of abrupt Sb doping profiles in MBE-grown Si, 120
Avalanche suppression
Electric field tailoring in MBE-grown vertical sub-100 nm MOSFETs, 206
Avalanche switching
Application of selective epitaxial growth in MBE for short-duration gating systems, 228

Band alignment
Photoluminescence in UHV-CVD-grown $Si_{1-x}Ge_x$ quantum wells on Si(100): band alignment variation with excitation density and applied uniaxial stress, 158
Band engineering
Bistable diodes grown by silicon molecular beam epitaxy, 201
Bistability
Bistable diodes grown by silicon molecular beam epitaxy, 201
Boron contamination
Quantitative secondary ion mass spectrometry analysis of SiO_2 desorption during in situ heat cleaning, 148

Carbon
Molecular beam epitaxial growth and photoluminescence investigation of $Si_{1-y}C_y$ layers, 33
Carbon incorporation
Carbon-containing group IV heterostructures on Si: properties and device applications, 11
Carrier lifetime
Optimized processing for differentially molecular beam epitaxy-grown SiGe(C) devices, 21
Chemical vapor deposition
Comparison of $Si/Si_{1-x-y}Ge_xC_y$ and $Si/Si_{1-y}C_y$ heterojunctions grown by rapid thermal chemical vapor deposition, 41
X-Ray scattering investigation of the interfaces in $Si/Si_{1-x}Ge_x$ superlattices on Si(001) grown by MBE and UHV-CVD, 141
Cl_2
Si selective epitaxial growth using Cl_2 pulsed molecular flow method, 256
CMOS
Silicon germanium heterostructures in electronics: the present and the future, 172

2D hole gas
Effective mass measurement in two-dimensional hole gas in strained $Si_{1-x-y}Ge_xC_y$/ Si(100) modulation doped heterostructures, 51
δ-doping
Bistable diodes grown by silicon molecular beam epitaxy, 201
Diode
Bistable diodes grown by silicon molecular beam epitaxy, 201
Dopant surface segregation
Role of strain in dopant surface segregation during Si and SiGe growth by molecular beam epitaxy, 131
Doping
Electrical and optical properties of phosphorus doped $Ge_{1-y}C_y$, 47
Surfactant-grown low-doped germanium layers on silicon with high electron mobilities, 125

Electrical properties
Comparison of $Si/Si_{1-x-y}Ge_xC_y$ and $Si/Si_{1-y}C_y$ heterojunctions grown by rapid thermal chemical vapor deposition, 41
Electrical and optical properties of phosphorus doped $Ge_{1-y}C_y$, 47
Electrical properties of two-dimensional electron gases grown on cleaned SiGe virtual substrates, 181
Electric-field tailoring
Electric field tailoring in MBE-grown vertical sub-100 nm MOSFETs, 206
Electroluminescence
Luminescence from erbium- and oxygen-doped SiGe grown by molecular beam epitaxy, 219
Electron microscopy
Bimodal height distribution of self-assembled germanium islands grown on $Si_{0.84}Ge_{0.16}$ pseudo-substrates, 92
Epitaxial silicides
Self-ordering of $CoSi_2$ precipitates and epitaxial layer growth of $CoSi_2$ on Si(100), 251
Epitaxy
Comparison of $Si/Si_{1-x-y}Ge_xC_y$ and $Si/Si_{1-y}C_y$ heterojunctions grown by rapid thermal chemical vapor deposition, 41
Bimodal height distribution of self-assembled germanium islands grown on $Si_{0.84}Ge_{0.16}$ pseudo-substrates, 92
Si selective epitaxial growth using Cl_2 pulsed molecular flow method, 256

0040-6090/98/$19.00 © 1998 Elsevier Science S.A. All rights reserved
PII S0040-6090(98)00859-1

Er_2O_3 and ErF_3 doped Si layers
Incorporation and luminescence properties of Er_2O_3 and ErF_3 doped Si layers grown by molecular beam epitaxy, 223
Erbium
Luminescence from erbium- and oxygen-doped SiGe grown by molecular beam epitaxy, 219
Exciton binding energy
Quantum confined Stark shifts in type-I SiGe quantum structures, 215

Facet structure
Fabrication of SiGe quantum dots: a new approach based on selective growth on chemically prepared H-passivated Si(100) surfaces, 98

Germanium
Alignment of Ge three-dimensional islands on faceted Si(001) surfaces, 55
Bimodal height distribution of self-assembled germanium islands grown on $Si_{0.84}Ge_{0.16}$ pseudo-substrates, 92
Surfactant-grown low-doped germanium layers on silicon with high electron mobilities, 125
Photoluminescence in UHV-CVD-grown $Si_{1-x}Ge_x$ quantum wells on Si(100): band alignment variation with excitation density and applied uniaxial stress, 158
Ge dots
Influence of pre-grown carbon on the formation of germanium dots, 70
Germanium carbon
Electrical and optical properties of phosphorus doped $Ge_{1-y}C_y$, 47
Growth conditions
Optimization of growth conditions for strained $Si/Si_{1-y}C_y$ structures, 15
Growth mechanism
Bimodal height distribution of self-assembled germanium islands grown on $Si_{0.84}Ge_{0.16}$ pseudo-substrates, 92

Hall mobility
Surfactant-grown low-doped germanium layers on silicon with high electron mobilities, 125
Heterobipolar transistor
Carbon-containing group IV heterostructures on Si: properties and device applications, 11
Optimized processing for differentially molecular beam epitaxy-grown SiGe(C) devices, 21
Heteroepitaxy
Surfactant-grown low-doped germanium layers on silicon with high electron mobilities, 125
Heterojunction bipolar transistor
Silicon germanium heterostructures in electronics: the present and the future, 172
H-passivation
Optimized processing for differentially molecular beam epitaxy-grown SiGe(C) devices, 21
Hydrogen atoms
Formation of thin gate oxides on SiGe with atomic oxygen, 196

In situ cleaning oxide desorption
Quantitative secondary ion mass spectrometry analysis of SiO_2 desorption during in situ heat cleaning, 148
Infrared detectors
Near and mid infrared silicon/germanium based photodetection, 186
Interdiffusion
Effect of Sb as a surfactant on the inner diffusion of epilayer Ge atoms into Si substrate, 116
Interface
Quantitative secondary ion mass spectrometry analysis of SiO_2 desorption during in situ heat cleaning, 148
Interfacial states
Formation of thin gate oxides on SiGe with atomic oxygen, 196

Lattice strain
Role of strain in dopant surface segregation during Si and SiGe growth by molecular beam epitaxy, 131
Layer thickness variation
Effect of layer thickness variation on light scattering by acoustic phonons in SiGe/Si superlattices, 163
Low dimensional structures
Epitaxial Si/SiO_2 low dimensional structures, 234
Luminescence
Incorporation and luminescence properties of Er_2O_3 and ErF_3 doped Si layers grown by molecular beam epitaxy, 223

Mass measurement
Effective mass measurement in two-dimensional hole gas in strained $Si_{1-x-y}Ge_xC_y$/ Si(100) modulation doped heterostructures, 51
MBE-grown pin diodes
Low temperature electrical surface passivation of MBE-grown pin diodes by hydrogen and oxygen plasma processes, 261
MODFET
Silicon germanium heterostructures in electronics: the present and the future, 172
Molecular beam epitaxy
Optimization of growth conditions for strained $Si/Si_{1-y}C_y$ structures, 15
$Si_{1-x-y}Ge_xC_y$/Si quantum well structures: electrical and optical properties, 26
Molecular beam epitaxial growth and photoluminescence investigation of $Si_{1-y}C_y$ layers, 33
Electrical and optical properties of phosphorus doped $Ge_{1-y}C_y$, 47
Self-organized germanium quantum dots grown by molecular beam epitaxy on Si(100), 60
Suppression of phonon replica in the radiative recombination of an MBE-grown type-II Ge/Si quantum dot, 65
Influence of pre-grown carbon on the formation of germanium dots, 70
Direct MBE growth of SiGe dots on ordered mesoporous glass-coated Si substrate, 76
Characterization of self-assembled Ge islands on Si(100) by atomic force microscopy and transmission electron microscopy, 86
Effect of Sb as a surfactant on the inner diffusion of epilayer Ge atoms into Si substrate, 116
Atomic hydrogen for the formation of abrupt Sb doping profiles in MBE-grown Si, 120
Surfactant-grown low-doped germanium layers on silicon with high electron mobilities, 125

Role of strain in dopant surface segregation during Si and SiGe growth by molecular beam epitaxy, 131
X-Ray scattering investigation of the interfaces in $Si/Si_{1-x}Ge_x$ superlattices on Si(001) grown by MBE and UHV-CVD, 141
Spontaneous oscillator strength modulation in MBE-grown Si/Ge superlattices, 153
Near and mid infrared silicon/germanium based photodetection, 186
Incorporation and luminescence properties of Er_2O_3 and ErF_3 doped Si layers grown by molecular beam epitaxy, 223
Epitaxial Si/SiO_2 low dimensional structures, 234
Characterization of SiGe strained heterostructures grown by molecular beam epitaxy using a Si effusion cell, 241
Molecular beam epitaxy growth and thermal stability of $Si_{1-x}Ge_x$ layers on extremely thin silicon-on-insulator substrates, 245
Self-ordering of $CoSi_2$ precipitates and epitaxial layer growth of $CoSi_2$ on Si(100), 251
Molecular beam epitaxial growth
Gas-source molecular beam epitaxial growth of SiGe alloy-based 'naked' quantum wells, 81
MOSFET
$Si/Si_{1-x}Ge_x$ and $Si/Si_{1-y}C_y$ heterostructures: materials for high-speed field-effect transistors, 1
Silicon germanium heterostructures in electronics: the present and the future, 172
Multiple quantum wells
Growth of SiGe/Si multiple quantum wells by ultra-high-vacuum electron cyclotron resonance chemical vapor deposition, 111

Non-linear transmission lines
Application of selective epitaxial growth in MBE for short-duration gating systems, 228

Optical
Electrical and optical properties of phosphorus doped $Ge_{1-y}C_y$, 47
Ordered supperlattices
Spontaneous oscillator strength modulation in MBE-grown Si/Ge superlattices, 153
Oscillator strength
Spontaneous oscillator strength modulation in MBE-grown Si/Ge superlattices, 153
Oxidation
Formation of thin gate oxides on SiGe with atomic oxygen, 196

PDBFET
Electric field tailoring in MBE-grown vertical sub-100 nm MOSFETs, 206
Phosphorus
Electrical and optical properties of phosphorus doped $Ge_{1-y}C_y$, 47
Photoluminescence
Molecular beam epitaxial growth and photoluminescence investigation of $Si_{1-y}C_y$ layers, 33
Influence of pre-grown carbon on the formation of germanium dots, 70
Gas-source molecular beam epitaxial growth of SiGe alloy-based 'naked' quantum wells, 81
Photoluminescence in UHV-CVD-grown $Si_{1-x}Ge_x$ quantum wells on Si(100): band alignment variation with excitation density and applied uniaxial stress, 158
Luminescence from erbium- and oxygen-doped SiGe grown by molecular beam epitaxy, 219
Characterization of SiGe strained heterostructures grown by molecular beam epitaxy using a Si effusion cell, 241
Photoreflectance
Characterization of SiGe strained heterostructures grown by molecular beam epitaxy using a Si effusion cell, 241
Plasma processes
Low temperature electrical surface passivation of MBE-grown pin diodes by hydrogen and oxygen plasma processes, 261

Quantum confined Stark shift
Quantum confined Stark shifts in type-I SiGe quantum structures, 215
Quantum dots
Alignment of Ge three-dimensional islands on faceted Si(001) surfaces, 55
Self-organized germanium quantum dots grown by molecular beam epitaxy on Si(100), 60
Influence of pre-grown carbon on the formation of germanium dots, 70
Fabrication of SiGe quantum dots: a new approach based on selective growth on chemically prepared H-passivated Si(100) surfaces, 98
Quantum effect device
Silicon germanium heterostructures in electronics: the present and the future, 172
Quantum structures
Characterization of self-assembled Ge islands on Si(100) by atomic force microscopy and transmission electron microscopy, 86
Quantum well
Gas-source molecular beam epitaxial growth of SiGe alloy-based 'naked' quantum wells, 81
Quantum well structure
$Si_{1-x-y}Ge_xC_y/Si$ quantum well structures: electrical and optical properties, 26
Quantum wire
Quantum wire transistor at locally grown edges, 106

Radiative recombination
Suppression of phonon replica in the radiative recombination of an MBE-grown type-II Ge/Si quantum dot, 65
Raman scattering
Effect of layer thickness variation on light scattering by acoustic phonons in SiGe/Si superlattices, 163
Rapid thermal annealing
$Si_{1-x-y}Ge_xC_y/Si$ quantum well structures: electrical and optical properties, 26
Relaxed buffers
Artificial substrates for n- and p-type SiGe heterostructure field-effect transistors, 136
Rocking curves
Molecular beam epitaxial growth and photoluminescence investigation of $Si_{1-y}C_y$ layers, 33

Sb
Surfactant-grown low-doped germanium layers on silicon with high electron mobilities, 125
Secondary ion mass spectrometry
Atomic hydrogen for the formation of abrupt Sb doping profiles in MBE-grown Si, 120
Selective epitaxial growth
Application of selective epitaxial growth in MBE for short-duration gating systems, 228
Si selective epitaxial growth using Cl_2 pulsed molecular flow method, 256
Selective growth
Fabrication of SiGe quantum dots: a new approach based on selective growth on chemically prepared H-passivated Si(100) surfaces, 98
Self-assembled Ge islands
Characterization of self-assembled Ge islands on Si(100) by atomic force microscopy and transmission electron microscopy, 86
Self-ordering
Self-ordering of $CoSi_2$ precipitates and epitaxial layer growth of $CoSi_2$ on Si(100), 251
Self-organised growth
Quantum wire transistor at locally grown edges, 106
Self-organization
Alignment of Ge three-dimensional islands on faceted Si(001) surfaces, 55
Short-duration gating
Application of selective epitaxial growth in MBE for short-duration gating systems, 228
Silicon
Molecular beam epitaxial growth and photoluminescence investigation of $Si_{1-y}C_y$ layers, 33
Comparison of $Si/Si_{1-x-y}Ge_xC_y$ and $Si/Si_{1-y}C_y$ heterojunctions grown by rapid thermal chemical vapor deposition, 41
Alignment of Ge three-dimensional islands on faceted Si(001) surfaces, 55
Bimodal height distribution of self-assembled germanium islands grown on $Si_{0.84}Ge_{0.16}$ pseudo-substrates, 92
Atomic hydrogen for the formation of abrupt Sb doping profiles in MBE-grown Si, 120
Photoluminescence in UHV-CVD-grown $Si_{1-x}Ge_x$ quantum wells on Si(100): band alignment variation with excitation density and applied uniaxial stress, 158
Si(100)
Effective mass measurement in two-dimensional hole gas in strained $Si_{1-x-y}Ge_xC_y$/ Si(100) modulation doped heterostructures, 51
Si(111)
Surfactant-grown low-doped germanium layers on silicon with high electron mobilities, 125
Si effusion cell
Characterization of SiGe strained heterostructures grown by molecular beam epitaxy using a Si effusion cell, 241
Si substrate
Direct MBE growth of SiGe dots on ordered mesoporous glass-coated Si substrate, 76
$Si/Si_{1-y}C_y$
Optimization of growth conditions for strained $Si/Si_{1-y}C_y$ structures, 15
Silicon and germanium
Carbon-containing group IV heterostructures on Si: properties and device applications, 11
Near and mid infrared silicon/germanium based photodetection, 186
Luminescence from erbium- and oxygen-doped SiGe grown by molecular beam epitaxy, 219
$Si_{1-x}Ge_x$
Growth of SiGe/Si multiple quantum wells by ultra-high-vacuum electron cyclotron resonance chemical vapor deposition, 111
$Si_{1-x}Ge_x$
Molecular beam epitaxy growth and thermal stability of $Si_{1-x}Ge_x$ layers on extremely thin silicon-on-insulator substrates, 245
$Si_{1-x}Ge_x$ quantum wells
Quantum confined Stark shifts in type-I SiGe quantum structures, 215
SiGe
Optimized processing for differentially molecular beam epitaxy-grown SiGe(C) devices, 21
$Si_{1-x-y}Ge_xC_y$/Si quantum well structures: electrical and optical properties, 26
Influence of pre-grown carbon on the formation of germanium dots, 70
Gas-source molecular beam epitaxial growth of SiGe alloy-based 'naked' quantum wells, 81
Surfactant-grown low-doped germanium layers on silicon with high electron mobilities, 125
Formation of thin gate oxides on SiGe with atomic oxygen, 196
Si/Ge quantum well and superlattices
Near and mid infrared silicon/germanium based photodetection, 186
Si/SiGe heterostructures
Silicon germanium heterostructures in electronics: the present and the future, 172
Si/SiGe superlattice
X-Ray scattering investigation of the interfaces in $Si/Si_{1-x}Ge_x$ superlattices on Si(001) grown by MBE and UHV-CVD, 141
Si/SiO_2
Epitaxial Si/SiO_2 low dimensional structures, 234
SiGe alloy
Si selective epitaxial growth using Cl_2 pulsed molecular flow method, 256
SiGe dot matrix
Direct MBE growth of SiGe dots on ordered mesoporous glass-coated Si substrate, 76
SiGe MODFETs
Artificial substrates for n- and p-type SiGe heterostructure field-effect transistors, 136
SiGe substrates
Electrical properties of two-dimensional electron gases grown on cleaned SiGe virtual substrates, 181
SiGe/C
Optimized processing for differentially molecular beam epitaxy-grown SiGe(C) devices, 21
SiGe/Si base heterostructure bipolar transistors (HBTs)
Structural characterization of a UHV/CVD-grown SiGe HBT with graded base, 167

SiGe/Si superlattices
Effect of layer thickness variation on light scattering by acoustic phonons in SiGe/Si superlattices, 163
Silicon MBE
Quantum wire transistor at locally grown edges, 106
Quantitative secondary ion mass spectrometry analysis of SiO_2 desorption during in situ heat cleaning, 148
Electric field tailoring in MBE-grown vertical sub-100 nm MOSFETs, 206
Silicon molecular beam epitaxy
Application of selective epitaxial growth in MBE for short-duration gating systems, 228
Silicon MOSFET
Quantum wire transistor at locally grown edges, 106
Silicon-based heterostructure
$Si/Si_{1-x}Ge_x$ and $Si/Si_{1-y}C_y$ heterostructures: materials for high-speed field-effect transistors, 1
Silicon-germanium heterojunction bipolar transistors
Application of selective epitaxial growth in MBE for short-duration gating systems, 228
Stanski–Krastanov growth
Alignment of Ge three-dimensional islands on faceted Si(001) surfaces, 55
Characterization of self-assembled Ge islands on Si(100) by atomic force microscopy and transmission electron microscopy, 86
Strain compensation
Influence of pre-grown carbon on the formation of germanium dots, 70
Strain relaxation
Molecular beam epitaxy growth and thermal stability of $Si_{1-x}Ge_x$ layers on extremely thin silicon-on-insulator substrates, 245
Strain-adjusting epilayer
$Si/Si_{1-x}Ge_x$ and $Si/Si_{1-y}C_y$ heterostructures: materials for high-speed field-effect transistors, 1
Strained layer
Carbon-containing group IV heterostructures on Si: properties and device applications, 11
Structural characterization
Structural characterization of a UHV/CVD-grown SiGe HBT with graded base, 167
Surface passivation
Low temperature electrical surface passivation of MBE-grown pin diodes by hydrogen and oxygen plasma processes, 261
Surface roughness
Artificial substrates for n- and p-type SiGe heterostructure field-effect transistors, 136
Surfactant
Effect of Sb as a surfactant on the inner diffusion of epilayer Ge atoms into Si substrate, 116
Surfactant-grown low-doped germanium layers on silicon with high electron mobilities, 125
Surfactant-assisted growth
Atomic hydrogen for the formation of abrupt Sb doping profiles in MBE-grown Si, 120
Thermal stability
Molecular beam epitaxy growth and thermal stability of $Si_{1-x}Ge_x$ layers on extremely thin silicon-on-insulator substrates, 245
Three-dimensional islanding growth
Self-organized germanium quantum dots grown by molecular beam epitaxy on Si(100), 60
Transmission electron microscopy
Characterization of self-assembled Ge islands on Si(100) by atomic force microscopy and transmission electron microscopy, 86
Tunnel
Bistable diodes grown by silicon molecular beam epitaxy, 201
Two-dimensional electron gases
Electrical properties of two-dimensional electron gases grown on cleaned SiGe virtual substrates, 181
Type-II Ge/Si quantum dot
Suppression of phonon replica in the radiative recombination of an MBE-grown type-II Ge/Si quantum dot, 65

Ultra-high-vacuum chemical vapor deposition (UHV/CVD)
Structural characterization of a UHV/CVD-grown SiGe HBT with graded base, 167
Si selective epitaxial growth using Cl_2 pulsed molecular flow method, 256
Ultra-high-vacuum electron cyclotron resonance chemical vapor deposition (UHV-ECRCVD)
Growth of SiGe/Si multiple quantum wells by ultra-high-vacuum electron cyclotron resonance chemical vapor deposition, 111

Velocity overshoot
Electric field tailoring in MBE-grown vertical sub-100 nm MOSFETs, 206
Vertical sub-100 nm MOSFETs
Electric field tailoring in MBE-grown vertical sub-100 nm MOSFETs, 206
VLSI technology
$Si/Si_{1-x}Ge_x$ and $Si/Si_{1-y}C_y$ heterostructures: materials for high-speed field-effect transistors, 1

X-ray
Molecular beam epitaxial growth and photoluminescence investigation of $Si_{1-y}C_y$ layers, 33
X-ray diffraction
Characterization of SiGe strained heterostructures grown by molecular beam epitaxy using a Si effusion cell, 241
X-ray scattering
X-ray scattering investigation of the interfaces in $Si/Si_{1-x}Ge_x$ superlattices on Si(001) grown by MBE and UHV-CVD, 141
